Quarterly News

Spring
2011

*****Book Now*** - Guna Conference - October 15th at the RLHIM London**
Following the success of the conference last year, the Guna conference will again be held at the Royal London Hospital for Integrated Medicine.
Dr Alessandro Perra will be conducting a full day of lectures again covering a huge range of subjects, the focus of which will be announced shortly.
The day begins at 9.30am for registration with lecture beginning at 10am.

Book your place now to avoid disappointment.
The day is great value at £65.00 which includes a hot fork lunch. To book contact Cyto-Solutions, the contact details are on the back of this newsletter.

We look forward to seeing you there!

New Product - FerroGuna

FerroGuna supplies 100% of the recommended daily dose of iron and is highly absorbable because it is delivered in an organic complex (iron fumarate) in an orodispersible form that is immediately bioavailable to the organism. The contents of one sachet contains 14mg of iron fumarate which releases around 5mg of ferrous iron for absorption. This iron's bioavailability is increased by the presence of vitamin C, copper and the flesh of the baobab fruit. These additions not only increase the bioavailability, but also supply the organism with antioxidants. FerroGuna melts directly in the mouth without water and is rapidly absorbed and does not cause gastrointestinal side effects.

New!

In particular physiological conditions FerroGuna enhances the production of haemoglobin and is recommended as an ideal support in cases of:

Increases of Iron need: During pregnancy.

Reduced Iron Intestinal Absorption: Diet deficiencies, intestinal diseases affecting iron absorption, celiac disease in particular.

Physiological Increase in Blood Loss: Abundant menstruation.

Pathological Increase in Blood Loss: Gastritis and gastroduodenal ulcer, gastrointestinal alterations

New!

GUNA MEDICAL DEVICES

Guna Medical Devices:

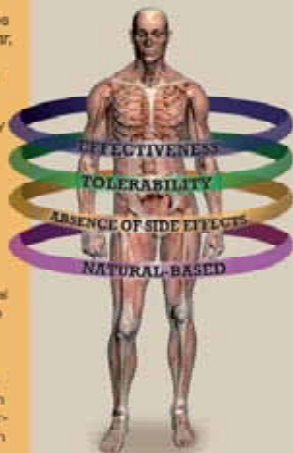

- are available in 2 ml ampoules via peri-articular, intra-articular, intra-muscular, sub-cutaneous and intra-dermal administration;

- contain collagen and ancillary substances. Those last substances are natural and allow a better and more focused positioning of the collagen in situ.

With the aim of:

- improving the histological constitution of the anatomical structure in which the device is injected and that of the collagen itself;

- offering mechanical support with a clear positive effect on the stabilization of joint hyper-mobility, on movements, pain and quality of life.

Guna MDs are Collagen-based. In Guna Laboratories, 3 different manufacturing processes are performed:

- **Cross-flow filtration**
- **Sterilization**
- **Molecular Weight Control**

These processes aim at obtaining a pure product with standardized molecular weight and physical-chemical characteristics. The high quality of these products makes Guna MD the ideal means for collagen supplementation where it is most needed.

They guarantee

CLINICAL SAFETY AND REPRODUCIBILITY OF RESULTS

INDUSTRIAL PROCESS DEVELOPED BY GUNA!

GUNA MEDICAL DEVICES

Effective MDs

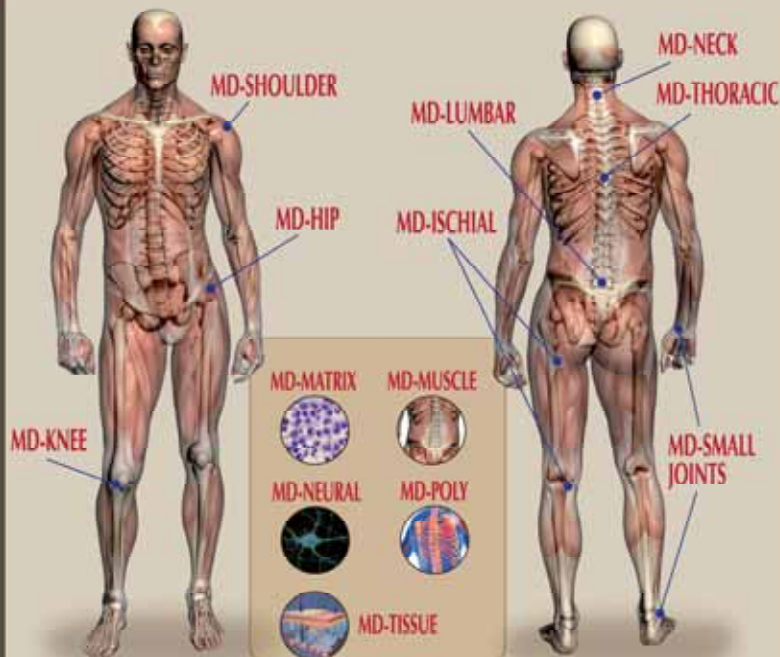

as they contain highly purified collagen and natural ancillary substances

Innovative MDs

as they are the only Medical Devices active also on the external joint capsule

	MD-HIP (hip)	Collagen + Calcium phosphate	Improve mobility of the hip joint, help muscle stretching on the lombo-sacral area, help to support peri-articular muscle tissue, soothe local pain and pain due to joint movement or bad posture.
	MD-ISCHIAL (sciatic nerve)	Collagen + Rhododendron chrysanthum	Improve leg mobility, leg muscle stretching, help to support leg muscle tissue, soothe leg pain while starting to move legs again after a long inactivity period
	MD-KNEE (knee)	Collagen + Arnica montana	Improve knees mobility, help muscle stretching, soothe knee pain while moving legs and knees
	MD-LUMBAR (lumbar zone)	Collagen + Hamamelis virginiana	Help lumbar region mobility, help muscle stretching of the lombo-sacral area, help to support the lumbar muscle tissue, soothe local pain, pain at rest or caused by movement and bad posture
	MD-NECK (neck)	Collagen + silica	Improve mobility of the cervical region of the spine, promote cervical muscle stretching, help to support cervical muscle tissue, help to support cervical muscle tissue in bad posture disorders, soothe cervical column pain due to movements
	MD-SHOULDER (shoulder)	Collagene + Iris versicolor	Improve shoulder- and arm-joint mobility, help muscle stretching, help to support the muscle tissue, soothe local pain and pain due to movement

A complete line for the treatment of all painful forms affecting the musculoskeletal system

	MD-SMALL JOINTS (small joints)	Collagen + Viola odorata	Improve mobility of the small joints of hand, foot and ankle, help muscle stretching, help to support muscle tissue, soothe local pain and pain due to movement
	MD-THORACIC (thorax)	Collagen + Cimicifuga racemosa	Improve mobility of the thoracic tract of the spine, help muscle stretching, help to support muscle tissue in bad posture disorders, soothe leg pain, pain due to movement and bad posture
	MD-MATRIX (extracellular matrix)	Collagen + citric acid + nicotinamide	Strengthen matrix tissues where the collagen barrier is located, act as a defensive barrier against free radicals
	MD-MUSCLE (muscles)	Collagen + Hypericum perforatum	Enhance muscle relaxation and functioning, help to support the muscle tissues in bad posture disorders, improve joint mobility, soothe local pain, pain at rest or caused by movement and bad posture
	MD-NEURAL (nerve)	Collagen + Citrullus colocynthis	Strengthen perineurium collagen structure, soothe neural local pain
	MD-POLY (joints)	Collagen + Drosera rotundifolia	Improve joint mobility, help muscle stretching, help to support the muscle tissue in bad posture disorders, soothe local pain and pain due to joint movement or bad posture
	MD-TISSUE (soft tissues)	Collagen + ascorbic acid + magnesium gluconate + pyroxine hydrochloride + riboflavin + thiamine hydrochloride	Act as a defensive barrier against free radicals, counterbalance the physiological aging of the connective tissue

Guna Medical Devices are in stock and available from Cyto-Solutions Ltd
